About me

Junior Web Developer with a passion for technology and a great predisposition for continuous learning. Specialised in developing optimal and efficient solutions for the user. Experience in: **React**, **Vue**, **HTML5**, **CSS3**, **JavaScript**, **Tailwind**, **PHP**, **Symfony**, etc. My background in **natural sciences** and **environmental education** has given me the ability to thoroughly understand the needs of clients and translate them into functional and intuitive solutions. In addition, I have excellent **communication skills** that allow me to collaborate effectively in teams and ensure that projects meet expectations. Currently looking for opportunities to contribute to innovative projects.

Work experience

Full Stack Developer, Enreach Labs   Apr 2024 - Jun 2024

I developed with a team a web application consisting of a virtual library with the aim of managing the company's books.
- Creation of the user interface using the following frontend technologies: **HTML5**, **CSS3**, **JavaScript**, **Vue**.
- Implementation of **unit tests** (with Vitest) and **end to end** tests (Cypress and Cucumber).
- Application containerisation using **Docker**.
- Creation of the backend using **PHP**, **Symfony** and **Api platform**.
- Implementation of unit tests in a backend environment using **Codeception**.
- Use of Agile methodologies: **Scrum** and **Kanban**.
- Implementation and management of **MySQL** database .
